TECHNOLOGIES

Core

- React - Redux, RxJS
- HTML5/CSS3 - SaaS
- JavaScript (ES6+)
- TypeScript
- Unit testing: Jest, React Testing Library
- Git
- AI-Assisted Development

Proficient

- Angular, Vue.js
- Node.js (Express)
- Python
- REST API
- Google Cloud Platform

LANGUAGES

- Polish (Native)
- English (C1 Certificate)
- Spanish (A1 - Beginner)

PROFILE

Software Engineer with over 3.5 years of experience, primarily focused on React and TypeScript. I am comfortable working across the full stack while maintaining a strong specialization in building high-quality user interfaces. Currently pursuing an MSc in Applied Computer Science, combining academic knowledge with strong commercial engineering practices.

WORK EXPERIENCE

Grid Dynamics 2022-PRESENT

Software Engineer

- Developed and maintained modular React components with a focus on performance optimization and seamless user interaction.
- Ensured code quality by applying SOLID and DRY principles and conducting thorough Code Reviews within the team.
- Leveraged impressive debugging skills and automated testing (Jest, RTL) to maintain a 99.9% crash-free UI experience.
- Collaborated with product teams to turn complex requirements into simple, beautiful frontend solutions using React and TypeScript.
- Advocated for UI consistency and mobile-first responsiveness, ensuring a high-quality experience across all devices.
- Optimized application performance and ensured cross-browser compatibility for international users.

AMS 2021

HR Intern

- Supported recruitment processes by engaging with candidates, evaluating CVs, and conducting interviews, enhancing team staffing efficiency.

EDUCATION

Master of Science in Applied Computer Science 2024-2026

Warsaw University of Technology

Bachelor's degree in Practical Computer Science 2020-2024

University of Gdańsk
